It's what's underneath that counts...

They're the hardest working pieces in your wardrobe! Make sure they're working for you, not against you.

- Take your time when shopping for foundations and never settle because you're overwhelmed. Stop and take a breather (or get a bevvie!) if needed.
- Have a professional bra fitting. Yes, it's intimate and yes, it makes all the difference.
- Look for quality - price does matter.
- Take your outfit with you if you're looking for a specific piece to go under it.
- Shop with a friend to make it a fun outing!
- Be brave and try a different style or design. You might surprise yourself.

Starting at ground level...

Look after your shoes and they'll look after you! Keep them dry and polished, use shoe trees or a blow-up boot shapers, and get repairs done immediately.

- Cobblers can stretch shoes and boots (but only to a degree).
- Use Windex to polish patent leather.
- Tiny nicks can be filled with a dab of similarly-colored nail polish.
